

Ouse Washes Section 10 works

Public drop-in event

February 2020

The Environment Agency would like to invite you to a drop-in event to find out more about the Ouse Washes bank raising works and the Welney Wash Road barrier works.

You will have the opportunity to meet the project team, see details of the barrier and discuss this year's work.

The drop-in event will be held:

18 March 2020

**William Marshall Centre
Hurn Road, Welney
Wisbech, PE14 9SD**

Between 3.30pm and 7.30pm

We would like to collect the communities' opinions on timings to help us decide the best period to do the work. We expect that the total construction time will be 14 weeks. During these 14 weeks, we will need to close the road for approximately 4-6 weeks to install the concrete slab across the road.

We will be publishing an online survey using our Ouse Washes Citizen Space information page which you can access scanning the QR Code opposite or following the link [Ouse Washes Section 10 works](#).

If you would like further information regarding the project or to receive regular updates, please forward your contact details to our Public Liaison Officer Monica Stonham at email ousewashesprojectea@gmail.com or call 07534 457348.
